I urge you to settle the Microsoft dispute as soon as possible. The consumers are NOT being served with this ridiculous suit. It was only launced to benefit a few competitors and NOT on behalf of the users. Leave Microsoft alone, it created a platform from which all others can build. Before this base, programs were written with various codes that were incompatible and a user had be be sure a pruchase would work and interact with other software. With Microsoft, everything works together.  
Thank you for listening. rebard@aol.com
